

# ASSIGNABLE SQUARE FEET PER STUDENT STATION FOR CLASSROOMS

## TABLE 10

The capacity of a room is determined by the size and shape of the room as well as the type of seating. The square feet per station of a room could be as few as nine for auditoriums equipped with small desks or as many as 30 for seminar rooms equipped with tables and chairs.

The number of stations per classroom is an important corollary to station size.

### Recommended Assignable Square Feet per Station

<u>Number of Stations</u>	<u>ASF for Tables and Chairs</u>	<u>ASF for Armchair Desks Small</u>	<u>ASF for Armchair Desks Large</u>
10-19	20-30	18	22
20-29	20-30	16	20
30-39	20-25	15	18
40-59	18-22	14	16
60-69	18-22	13	15
100-149	16-20	11	14
300+	16-18	09	12

The average student station per room is the ratio of the number of student stations (capacity of the room) to the number of rooms which have a room type of "110" (classrooms).

The square feet per student station is the ratio of total assignable square feet (net square feet) to the number of student stations. The assignable area is the sum of all areas of a building assigned to, or available for assignment to, an occupant. This includes every type of space functionally usable except that defined as custodial, circulation or mechanical. In this table only room types of "110" classrooms are being used.

Norm: 15 assignable square feet per station

$$\text{Average Student Station Per Room} = \frac{\text{Number of Student Stations}}{\text{Number of Rooms}}$$

$$\text{Square Feet Per Student Station} = \frac{\text{Total Assignable Square Feet}}{\text{Number of Student Stations}}$$
